Wragg, A. A., Applications of the limiting diffusion current technique in chemical engineering. 39

SUBJECT INDEX

	Page
Alcohol programme, Brazilian	239
Aluminium industry, pneumatic materials handling in Australia	255, 620, 624, 633
Brazil	239
Bulk storage and handling of material	165, 171, 865
Carbon fibres	333
Catalytic combustion of effluent gas	863
Coal conversion in Australia's future energy patterns ..	633
Comminution, future for	699
Computer control systems, specification of	709
Condition monitoring, application to process plant	587
Cost comparison of heat exchangers	338
Decision table analysis	175
Desalination in Australia	624
Direct heating process for milk	792
Diseases, occupational	569
Disposal of non-biodegradable toxic wastes	249
Distillery effluent treatment	239
Dye, removal from effluent	243
Economics, of naphtha versus gas cracking	500
Economics, of North Sea oil supplies	388
Education in chemical engineering in USA	251
Effluent treatment	239, 243, 247, 863
Electrochemical pump cell	867
Elizabethan era : the polymer age	515
Elongational flow during processing	95
Engineer in Society	870
Explosions and toxic escapes	573
Fault diagnosis	582
Fermenters, design of	106
Fertilisers	857, 865
Flour milling	705
Food processing	779
Forest utilisation industry in New Zealand	639
Gas cracking versus naphtha, economics of	500
Granulation processes	860
Grindability assessments	702

Handling of bulk materials 161, 165, 171, 255
Heat and mass transfer 100, 779
Heat exchangers, cost comparison of 338

Ionising radiation in chemical processes 33
Iron and steel industry in New Zealand 636
Iron ore indurator 629

Limiting diffusion current technique 39
Loss prevention 582

Major process disasters 578
Materials handling 161, 165, 171, 255
Meat refrigeration 788
Membrane separation plant 510
Microbial protein for food use 506
Milk sterilisation, direct heating process 792
Mineral and process industries in Australia 620
Monitoring process plant 175, 587

Naphtha and gas cracking, economics of 500
New Zealand 636, 639
Nitric acid plant effluent gas combustion 863
Non-biodegradable toxic wastes 249
Non-Newtonian fluids, heat and mass transfer in 100
North Sea oil 388, 393
Nylon-6 production 329

Occupational diseases 569
Offshore water services 397
Organosynthesis, application of pump cell to 867

Plasticating extruders, modelling of 91
Plate heat exchangers, cost comparison 338
Pneumatic materials handling 255
Polymer industry 98, 515
Process and mineral industries in Australia 620
Product characterisation 783
Pump cell, electrochemical, application 867

Refrigeration of meat 788
Rod mill tests for grindability 702

Shell and tube heat exchangers, cost comparison 338
Sieve trays, high capacity 45
Silica in removal of dye from effluent 243
Sterilisation of milk by direct heating 792

Toxic wastes, disposal and danger of 249, 573

UHT sterilisation of milk 792
Urea fertiliser storage 865
USA, chemical engineering education in 251

TITLE INDEX

Page

Application of chemical engineering concepts to the design of fermenters by R. Pollard and C. J. Shearer 106
Application of the bipolar electrochemical pump cell to organosynthesis by R. E. Jansson and N. R. Tomov .. 867
Applications of the limiting diffusion current technique in chemical engineering by A. A. Wragg 39
Australian desalination process becomes established by P. J. Cable, R. W. Murtagh and N. H. Pilkington .. 624

Bulk storage and handling in the chemical industry by G. C. Craven 171
Bulk storage of urea fertiliser by G. Midgley 865

Carbon fibres by J. R. Ball 333
Catalytic combustion of nitric acid plant effluent gas by H. Fischhof 863
Chemical engineering education in the USA by N. Harnby .. 251
Chemical engineering operations in the production of nylon-6 by G. McKay and K. L. Gardner 329
Chemical engineering techniques in the study of granulation processes by M. F. Wilson and A. G. Roberts 860
Coal conversion in Australia's future energy patterns by N. White and G. N. Keith 633
Condition monitoring and its application to process plant by B. J. Berenblut and J. Magid 587
Cost comparison of plate, and shell and tube heat exchangers by M. F. Edwards and R. Stinchcombe .. 338
Current work in materials handling at Warren Spring Laboratory by P. L. Bransby 161

Design of membrane separation plant by R. Gutman .. 510
Direct heating process for the UHT sterilisation of milk by H. Burton 792
Disposal of non-biodegradable toxic wastes by E. Street .. 249
Distillery effluent treatment in the Brazilian national alcohol programme by E. A. Jackman 239

Economics of naphtha versus gas cracking by L. E. Chambers and H. Singer 500
Economics of North Sea oil supplies by C. Robinson and J. R. Morgan 388
Effects of elongational flow during processing on product rheology by M. van den Tempel 95

Page

Elizabethan era: The polymer age by B. G. Reuben 515
Engineer in Society by R. Edgeworth Johnstone 870

Fertilisers through the looking glass by F. B. Walter 857
Future development of the iron and steel industry in New Zealand by K. A. Holborow 636
Future for comminution by G. C. Lowrison 699

Grindability assessments using laboratory rod mill tests by G. W. Cutting 702
Guide to the specification of computer control systems by P. I. Burton 709

Handling of bulk material by L. Bates 165
Heat and mass transfer in non-Newtonian fluids by G. Astarita and R. A. Mashelkar 100
Heat transfer in some food processing applications of fluidisation by R. Jowitt 779
How lethal are explosions and toxic escapes? by V. C. Marshall 573

Increased design efficiency through improved product characterisation by C. R. Elson 783
Investigation of major process disasters by J. C. Mecklenburgh 578

Kinetics of the removal of basic dye from effluent using silica by F. Alexander and G. McKay 243

Loss prevention through fault diagnosis by R. A. Collacott .. 582

Method of monitoring process plant based on a decision table analysis by B. J. Berenblut and H. B. Whitehouse 175

New considerations in the design and operation of high capacity sieve trays by C. J. D. Fell and W. V. Pinczewski 45

Occupational diseases by E. Boyland, A. Williams and M. Khogali 569
Offshore water services by B. P. Bedford 397
Optimal development of the North Sea's oilfields by P. R. Odell and K. E. Rosing 393
Optimisation of an iron ore indurator by R. J. Batterham, J. A. Thurlby and G. J. Thornton 629

Pneumatic materials handling in the aluminium industry by M. Payen .. 255
Prediction of process design data for meat refrigeration by C. Bailey and S. J. James .. 788
Processing of microbial protein for food use by A. N. Emery, A. J. Barker and A. L. Hargrave .. 506

Recent developments in the modelling of plasticating extruders by J. R. A. Pearson .. 91
Recent development of the process and mineral industries in Australia by D. Magasanik and I. J. Robinson .. 620
Recent trends in the forest utilisation industry in New Zealand by K. M. Chapman .. 639
Relevance of rheology to the solution of practical problems in the polymer industry by R. Byron Bird .. 98
Role of biological processes in the treatment of effluents from the chemical industry by F. A. Shabi and K. J. Ilett 247

Size reduction problems and processes in flour milling by D. J. Stevens .. 705

Viability of chemical processes using ionising radiation by A. V. Bridgwater and B. W. Hatt .. 33

BOOK REVIEW INDEX

Page

Advances in Biochemical Engineering Vol. 4 Edited by T. K. Ghose, A. Fiechter and N. Blakeborough .. 725
Air Pollution—Its Origin and Control by K. Wark and C. F. Warner .. 347
Annual Reviews of Industrial and Engineering Chemistry Vol. 2 Ed. V. Weekman Jr. .. 52

Catalysis—Heterogeneous and Homogeneous Edited by by B. Delmon and G. Jannes .. 436
Ceramic Materials (An Introduction to their properties) by R. Pampuch .. 346
Chemical Milling by William Harris .. 818
Chemical Reaction Engineering Reviews. Advances in Chemistry No 148 Ed. H. M. Hulbert .. 51
Chemical Tables by Bela Nemeth .. 54
Combustion of Sprays of Liquid Fuels by A. Williams .. 121
Combustion-Generated Pollution. Science Research Council .. 183
Computer-aided Data Book of Vapour/Liquid Equilibria. by M. Hirata, S. Che and K. Nagahoma. .. 261
Conservation of Resources. The Chemical Society .. 527
Control of Oil Pollution. Ed. J. Wardley-Smith .. 437
Corrosion and Oxidation of Metals by U. R. Evans .. 261

Design and Control of Chemical Process Systems by J. R. B. Borer .. 121

Elements of Nuclear Reactor Engineering by L. Wang Lau (Tennessee Valley Authority) .. 52
Encyclopedia of Chemical Processing and Design Vol. 1 Ed. J. J. McKetta .. 346
Energy and the Environment by H. Ashley, R. L. Rudman and C. Whipple .. 591
Energy Recovery in Process Plants. IMechE Conference Publication .. 818
Engineering Heat Transfer by J. R. Simonson .. 184
Engineering Investment Decisions by L. M. Rose .. 528

First European Conference on Mixing and Centrifugal Separation. BHRA Fluid Engineering. .. 121
Fluidisation Technology Vols. 1 & 2 Ed. D. L. Keairns .. 123
Fluid-Bed Heat Transfer by J. S. M. Botteril .. 51
Fuel Cells (Energy Alternatives Series) by A. O. McDougall 436
Fundamental Properties of Paper Ed. Francis Bolam .. 725
Fundamentals of Fibre Formation—the science of Fibre spinning and drawing by A. Ziabicki .. 346
Future Energy Production Systems. Vols 1 & 2 Edited by J C. Denton and N. H. Afgan .. 881

Handbook of Enzyme Biotechnology. Ed. A. Wiseman .. 54
Handbook of Thermodynamic Tables and Charts by K. Raznjevic .. 183
Health and Safety at Work by R. H. Capp .. 591

Industrial Safety Handbook Ed. William Handley .. 882
Introduction to Combustion Phenomena by A. Murty Kanury .. 726
ISPRA/Euratom Biannual Report 1974/1975 .. 527

Page

Jet Pumps and Ejectors—a State of the Art Review by S. T. Bonnington and A. L. King .. 528

Law and Practice relating to Pollution Control in the UK. by J. McLoughlin .. 261

Maintenance Management Techniques by A. S. Corder .. 435
Membrane Separation Processes. Ed. Patrick Meares .. 882
Molecular Sieves 11 by James R. Katzer .. 815

New Developments in Phosphate Fertiliser Technology by L. J. Carpentier .. 881
Nitrogen Industry, The. Ed. G. D. Honti .. 51

Optimal Development of the North Sea's Oilfields by P. R. Odell and K. E. Rosing .. 435
Order of Polymer Solutions Ed. Karel Solc .. 347

Practical Heat Recovery by J. L. Boyer .. 53
Preliminary Chemical Engineering by W. D. Baasel .. 123
Preliminary Chemical Engineering Plant Design by William Baasel .. 528
Profit Opportunities arising from North Sea Oil IMRA .. 593
Properties of Polymers (2nd revised edition) by D. W. Van Krevelen .. 435
Public Health Risks of Exposure to Asbestos. Report of a working group for the European Commission .. 815
Pump Handbook. Edited by Karassik, Krutzsch, Fraser and Messina .. 816

Quasilinear Hyperbolic Systems and Waves by A. Jeffrey .. 725

Role of the Risk Manager in Industry and Commerce .. 52

Science and Technology of Oil Shale by T. F. Yen .. 436
Separation Processes—Research and Development priorities by H. R. C. Pratt .. 648
Solar Cells Ed. C. E. Backus .. 346
Solar Energy; its Potential Contribution within the UK. Energy Technology Support Unit (Harwell) .. 726
Spray Drying, 2nd Edition by K. Masters .. 593
Statistical Methods for Engineers and Scientists by R. M. Bethea, B. S. Duran and T. L. Boullion .. 121
Statistical Quality Control Methods by I. W. Burr .. 593
Structural Adhesives Vol. 4 Ed. R. L. Patrick .. 261
Substitute Natural Gas by W. L. Law and A. F. Williams 53

Theory, Determination and Control of Physical Properties of Food Materials. Ed. Cho Kyun Rha .. 816
Theory of Backmixing by J. C. Mecklenburgh and S. Hartland .. 591
Theory and Practise of Emulsion Technology Ed. A. L. Smith .. 725
Thermal Energy Storage Ed. E. G. Kovach .. 183
Topics in Enzyme and Fermentation Biotechnology Ed. Alan Wiseman .. 882
Transfert de Matiere; Efficacite des Operations de Separation du Genie Chimique. by D. Defives and A. Rojey 183

Unit Operations of Chemical Engineering by Warren McCabe and J. C. Smith .. 53

Mineral and process industries in Australia 620
Monitoring process plant 175, 587

Naphtha and gas cracking, economics of 500
New Zealand 636, 639
Nitric acid plant effluent gas combustion 863
Non-biodegradable toxic wastes 249
Non-Newtonian fluids, heat and mass transfer in 100
North Sea oil 388, 393
Nylon-6 production 329

Occupational diseases 569
Offshore water services 397
Organosynthesis, application of pump cell to 867

Plasticating extruders, modelling of 91
Plate heat exchangers, cost comparison 338
Pneumatic materials handling 255
Polymer industry 98, 515
Process and mineral industries in Australia 620
Product characterisation 783
Pump cell, electrochemical, application 867

Refrigeration of meat 788
Rod mill tests for grindability 702

Shell and tube heat exchangers, cost comparison 338
Sieve trays, high capacity 45
Silica in removal of dye from effluent 243
Sterilisation of milk by direct heating 792

Toxic wastes, disposal and danger of 249, 573

UHT sterilisation of milk 792
Urea fertiliser storage 865
USA, chemical engineering education in 251

TITLE INDEX

Page

Application of chemical engineering concepts to the design of fermenters by R. Pollard and C. J. Shearer 106
Application of the bipolar electrochemical pump cell to organosynthesis by R. E. Jansson and N. R. Tomov .. 867
Applications of the limiting diffusion current technique in chemical engineering by A. A. Wragg 39
Australian desalination process becomes established by P. J. Cable, R. W. Murtagh and N. H. Pilkington .. 624

Bulk storage and handling in the chemical industry by G. C. Craven 171
Bulk storage of urea fertiliser by G. Midgley 865

Carbon fibres by J. R. Ball 333
Catalytic combustion of nitric acid plant effluent gas by H. Fischhof 863
Chemical engineering education in the USA by N. Harnby .. 251
Chemical engineering operations in the production of nylon-6 by G. McKay and K. L. Gardner 329
Chemical engineering techniques in the study of granulation processes by M. F. Wilson and A. G. Roberts 860
Coal conversion in Australia's future energy patterns by N. White and G. N. Keith 633
Condition monitoring and its application to process plant by B. J. Berenblut and J. Magid 587
Cost comparison of plate, and shell and tube heat exchangers by M. F. Edwards and R. Stinchcombe .. 338
Current work in materials handling at Warren Spring Laboratory by P. L. Bransby 161

Design of membrane separation plant by R. Gutman .. 510
Direct heating process for the UHT sterilisation of milk by H. Burton 792
Disposal of non-biodegradable toxic wastes by E. Street ... 249
Distillery effluent treatment in the Brazilian national alcohol programme by E. A. Jackman 239

Economics of naphtha versus gas cracking by L. E. Chambers and H. Singer 500
Economics of North Sea oil supplies by C. Robinson and J. R. Morgan 388
Effects of elongational flow during processing on product rheology by M. van den Tempel 95

Page

Elizabethan era: The polymer age by B. G. Reuben 515
Engineer in Society by R. Edgeworth Johnstone 870

Fertilisers through the looking glass by F. B. Walter 857
Future development of the iron and steel industry in New Zealand by K. A. Holborow 636
Future for comminution by G. C. Lowrison 699

Grindability assessments using laboratory rod mill tests by G. W. Cutting 702
Guide to the specification of computer control systems by P. I. Burton 709

Handling of bulk material by L. Bates 165
Heat and mass transfer in non-Newtonian fluids by G. Astarita and R. A. Mashelkar 100
Heat transfer in some food processing applications of fluidisation by R. Jowitt 779
How lethal are explosions and toxic escapes? by V. C. Marshall 573

Increased design efficiency through improved product characterisation by C. R. Elson 783
Investigation of major process disasters by J. C. Mecklenburgh 578

Kinetics of the removal of basic dye from effluent using silica by F. Alexander and G. McKay 243

Loss prevention through fault diagnosis by R. A. Collacott .. 582

Method of monitoring process plant based on a decision table analysis by B. J. Berenblut and H. B. Whitehouse 175

New considerations in the design and operation of high capacity sieve trays by C. J. D. Fell and W. V. Pinczewski 45

Occupational diseases by E. Boyland, A. Williams and M. Khogali 569
Offshore water services by B. P. Bedford 397
Optimal development of the North Sea's oilfields by P. R. Odell and K. E. Rosing 393
Optimisation of an iron ore indurator by R. J. Batterham, J. A. Thurlby and G. J. Thornton 629

Pneumatic materials handling in the aluminium industry by M. Payen .. 255
Prediction of process design data for meat refrigeration by C. Bailey and S. J. James .. 788
Processing of microbial protein for food use by A. N. Emery, A. J. Barker and A. L. Hargrave .. 506

Recent developments in the modelling of plasticating extruders by J. R. A. Pearson .. 91
Recent development of the process and mineral industries in Australia by D. Magasanik and I. J. Robinson .. 620
Recent trends in the forest utilisation industry in New Zealand by K. M. Chapman .. 639
Relevance of rheology to the solution of practical problems in the polymer industry by R. Byron Bird .. 98
Role of biological processes in the treatment of effluents from the chemical industry by F. A. Shabi and K. J. Ilett 247

Size reduction problems and processes in flour milling by D. J. Stevens .. 705

Viability of chemical processes using ionising radiation by A. V. Bridgwater and B. W. Hatt .. 33

BOOK REVIEW INDEX

Page

Advances in Biochemical Engineering Vol. 4 Edited by T. K. Ghose, A. Fiechter and N. Blakeborough .. 725
Air Pollution—Its Origin and Control by K. Wark and C. F. Warner .. 347
Annual Reviews of Industrial and Engineering Chemistry Vol. 2 Ed. V. Weekman Jr. .. 52

Catalysis—Heterogeneous and Homogeneous Edited by by B. Delmon and G. Jannes .. 436
Ceramic Materials (An Introduction to their properties) by R. Pampuch .. 346
Chemical Milling by William Harris .. 818
Chemical Reaction Engineering Reviews. Advances in Chemistry No 148 Ed. H. M. Hulbert .. 51
Chemical Tables by Bela Nemeth .. 54
Combustion of Sprays of Liquid Fuels by A. Williams .. 121
Combustion-Generated Pollution. Science Research Council .. 183
Computer-aided Data Book of Vapour/Liquid Equilibria. by M. Hirata, S. Che and K. Nagahoma. .. 261
Conservation of Resources. The Chemical Society .. 527
Control of Oil Pollution. Ed. J. Wardley-Smith .. 437
Corrosion and Oxidation of Metals by U. R. Evans .. 261

Design and Control of Chemical Process Systems by J. R. B. Borer .. 121

Elements of Nuclear Reactor Engineering by L. Wang Lau (Tennessee Valley Authority) .. 52
Encyclopedia of Chemical Processing and Design Vol. 1 Ed. J. J. McKetta .. 346
Energy and the Environment by H. Ashley, R. L. Rudman and C. Whipple .. 591
Energy Recovery in Process Plants. IMechE Conference Publication .. 818
Engineering Heat Transfer by J. R. Simonson .. 184
Engineering Investment Decisions by L. M. Rose .. 528

First European Conference on Mixing and Centrifugal Separation. BHRA Fluid Engineering. .. 121
Fluidisation Technology Vols. 1 & 2 Ed. D. L. Keairns .. 123
Fluid-Bed Heat Transfer by J. S. M. Botteril .. 51
Fuel Cells (Energy Alternatives Series) by A. O. McDougall 436
Fundamental Properties of Paper Ed. Francis Bolam .. 725
Fundamentals of Fibre Formation—the science of Fibre spinning and drawing by A. Ziabicki .. 346
Future Energy Production Systems. Vols 1 & 2 Edited by J. C. Denton and N. H. Afgan .. 881

Handbook of Enzyme Biotechnology. Ed. A. Wiseman .. 54
Handbook of Thermodynamic Tables and Charts by K. Raznjevic .. 183
Health and Safety at Work by R. H. Capp .. 591

Industrial Safety Handbook Ed. William Handley .. 882
Introduction to Combustion Phenomena by A. Murty Kanury .. 726
ISPRA/Euratom Biannual Report 1974/1975 .. 527

Page

Jet Pumps and Ejectors—a State of the Art Review by S. T. Bonnington and A. L. King .. 528

Law and Practice relating to Pollution Control in the UK. by J. McLoughlin .. 261

Maintenance Management Techniques by A. S. Corder .. 435
Membrane Separation Processes. Ed. Patrick Meares .. 882
Molecular Sieves 11 by James R. Katzer .. 815

New Developments in Phosphate Fertiliser Technology by L. J. Carpentier .. 881
Nitrogen Industry, The. Ed. G. D. Honti .. 51

Optimal Development of the North Sea's Oilfields by P. R. Odell and K. E. Rosing .. 435
Order of Polymer Solutions Ed. Karel Solc .. 347

Practical Heat Recovery by J. L. Boyer .. 53
Preliminary Chemical Engineering by W. D. Baasel .. 123
Preliminary Chemical Engineering Plant Design by William Baasel .. 528
Profit Opportunities arising from North Sea Oil IMRA .. 593
Properties of Polymers (2nd revised edition) by D. W. Van Krevelen .. 435
Public Health Risks of Exposure to Asbestos. Report of a working group for the European Commission .. 815
Pump Handbook. Edited by Karassik, Krutzsch, Fraser and Messina .. 816

Quasilinear Hyperbolic Systems and Waves by A. Jeffrey .. 725

Role of the Risk Manager in Industry and Commerce .. 52

Science and Technology of Oil Shale by T. F. Yen .. 436
Separation Processes—Research and Development priorities by H. R. C. Pratt .. 648
Solar Cells Ed. C. E. Backus .. 346
Solar Energy; its Potential Contribution within the UK. Energy Technology Support Unit (Harwell) .. 726
Spray Drying, 2nd Edition by K. Masters .. 593
Statistical Methods for Engineers and Scientists by R. M. Bethea, B. S. Duran and T. L. Boullion .. 121
Statistical Quality Control Methods by I. W. Burr .. 593
Structural Adhesives Vol. 4 Ed. R. L. Patrick .. 261
Substitute Natural Gas by W. L. Law and A. F. Williams 53

Theory, Determination and Control of Physical Properties of Food Materials. Ed. Cho Kyun Rha .. 816
Theory of Backmixing by J. C. Mecklenburgh and S. Hartland .. 591
Theory and Practise of Emulsion Technology Ed. A. L. Smith .. 725
Thermal Energy Storage Ed. E. G. Kovach .. 183
Topics in Enzyme and Fermentation Biotechnology Ed. Alan Wiseman .. 882
Transfert de Matiere; Efficacite des Operations de Separation du Genie Chimique. by D. Defives and A. Rojey 183

Unit Operations of Chemical Engineering by Warren McCabe and J. C. Smith .. 53
